**What's new in XContact 2.2.1 :**

- Add an Action menu to use a short-key to send a mail or go to an URL.
- Add new powerful Search functions
- Add Sort functions (By First name, Name, company) to display the search result selection .
- The "Phone book" build process can use the "Contact List" window content.
- Internal modems (iMac, G3, G4) can be detected using commToolbox.
- Last Search is saved , so the "Contact List" window will be displayed automatically after each launch.
- Some minor bugs are fixed.

Some functions in v2.2.1...
